Lynceus Entity-Relationship Diagram

Relationship Map

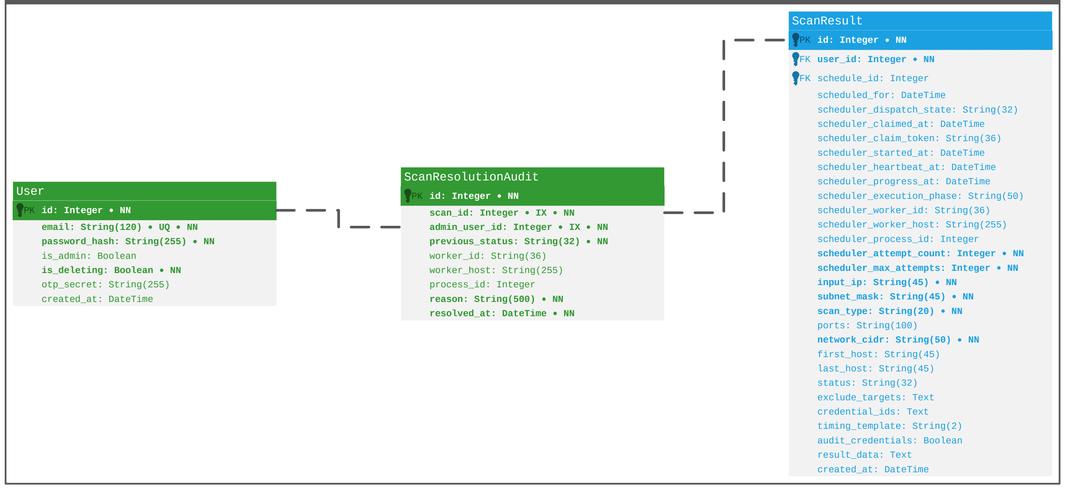

Notes

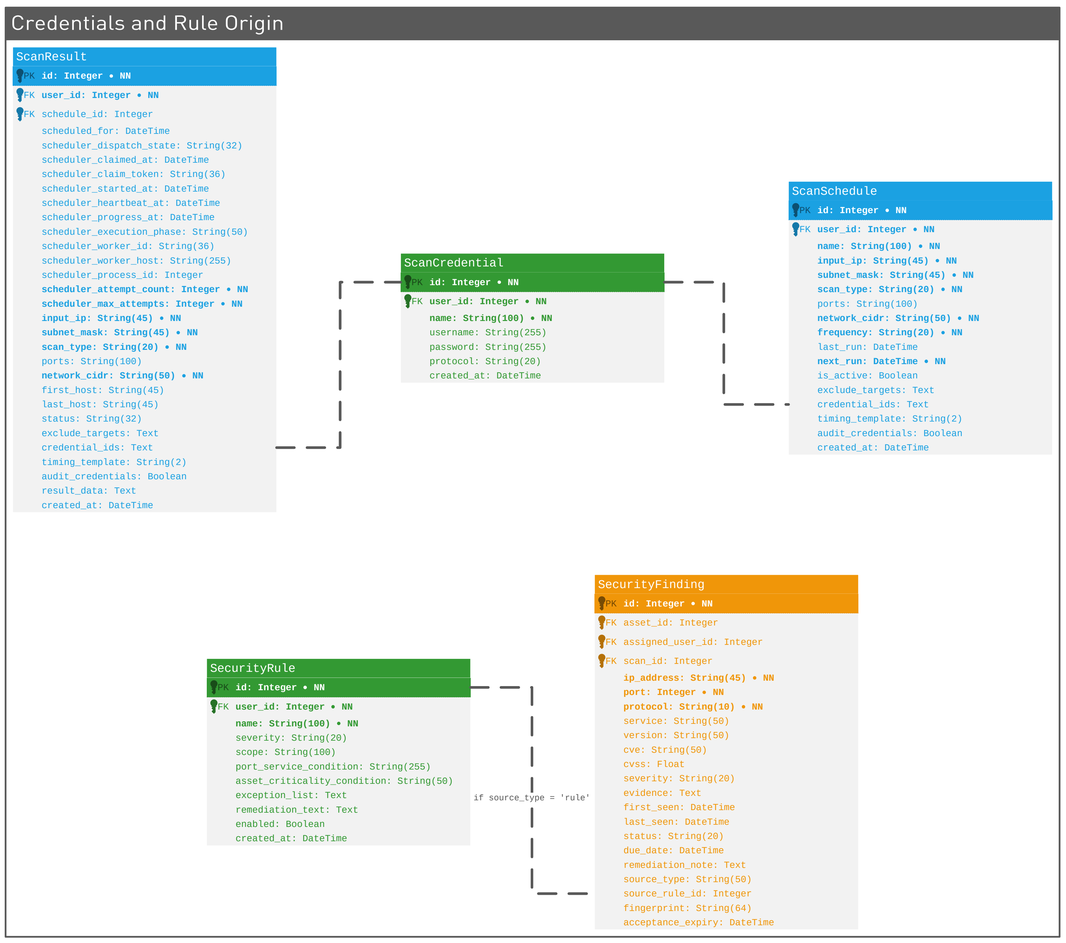

- Green: User Ownership
- Blue: Scan Provenance
- Orange: Asset Provenance
- PK: Primary Key
- FK: Foreign Key
- UQ: Unique
- NN: NOT NULL
- IX: Indexed
- Empty Marker: Nullable
- Scan dispatch lock has no record-level link.
- Solid connectors are declared foreign keys.

Application-Level Associations

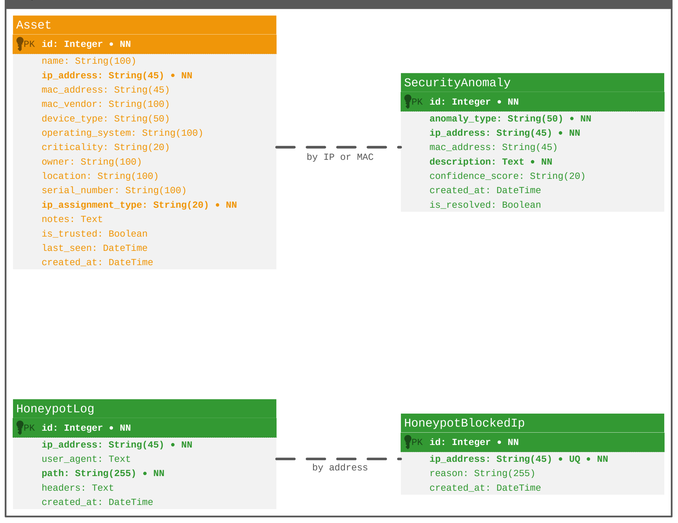

Audit Provenance

Credentials and Rule Origin

IP/MAC Correlation

Notes

- Dashed lines show matches and stored IDs used in code, without database foreign-key enforcement.
- These associations are conditional: they have no ON DELETE action or database-enforced cardinality.
- 7 application associations and no FK constraint.
